

RYAN JENNINGS

Technical Writer | Developer Documentation | Software Engineering

☎ + (64) 21 119 1348 @ ryanjennings83@protonmail.com
📍 Wellington, New Zealand 🌐 github.com/rjn9011

Technical writer and software developer with 7+ years of professional experience building and supporting web applications, APIs and internal systems.

Strong written communication skills, with a reputation for being the go-to person within the development team for writing, reviewing and refining technical material. Comfortable translating complex technical concepts into clear, accurate information for both technical and non-technical audiences.

Strong software engineering background across APIs, databases, cloud services, frontend development, testing and CI/CD, providing a practical understanding of the systems and code behind the documentation.

🎓 EDUCATION

2017 **Bachelor of Science**, Major in Computer Science, The University of Auckland
2012 **Tertiary Foundation Certificate**, The University of Auckland

👜 EXPERIENCE

February 2019
Present

ITS Developer, SOUTHERN INSTITUTE OF TECHNOLOGY,

Develop and maintain web applications, APIs and internal systems supporting student management, enrolment and operational processes. The role also involves communicating technical information to developers, business users and operational teams, as well as mentoring and assisting other developers.

- Develop and extend the Student Management, Enrolments and Student Portal systems
- Design and develop APIs used across internal systems and Microsoft 365 integrations
- Communicate technical requirements, system behaviour and development solutions clearly to both technical and non-technical colleagues
- Regularly review, refine and produce written technical material, with a strong focus on clarity, accuracy and consistency
- Frequently relied upon by colleagues to improve the clarity and quality of written material
- Explain technical concepts and solutions to colleagues and operational teams
- Mentor and assist other developers with technical problems and development practices
- Build Power Apps and Power Automate workflows to streamline internal processes and support operational teams
- CI/CD using Azure DevOps
- Unit testing and automated browser testing
